Product name: Choreganizer

Team name: Chorewhores

Members: Vania Gunawan, Vybhav Achar Bhargav, Kelly Xiao, Nethan Sanchez, Nick Usenko,

Ayden Chubbic

Date: July 23, 2019

Installation:
- No need to install anything, just need to visit choreganizer.netlify.com

User Manual:
- Signups/Login:
  - On top right hand corner, there are signup and login buttons.
  - To sign up, click signup and fill out the appropriate fields.
    - Must use unique username
    - Must use email not associated with an account
  - To Login, click login and use your username and password to sign into your account
- Creating a group:
  - To create a group, go to the "Create a House" section at the bottom left blue column. Type in the name of a group and then press the plus button on the right
  - Refresh the page to see your newly created group appear under "Your Places" on the left.
- To add members to a group:
  - Prereq: The buttons will not work for you if you are not part of a group. You must already be in a group (either one of your own making or someone else's making) in order to add members to a group.
  - Go to middle column under the large blue house icon. Under "Add a member", type in the username of the member you want to add into the input field. Click the blue plus icon to the right.
  - Refresh the page. You will not see the new members displayed anywhere, but if that user logs into their own account, they will see your group name listed under "Your Places"
- Adding a Chore
  - Prereq: The buttons will not work for you if you are not part of a group. You must already be in a group (either one of your own making or someone else's making) in order to assign users chores.

- ○ Go to the rightmost column and towards the bottom there is an input field that has the text placeholder "Chore Name". Type the name of the chore you want to assign, then in the input field under that, type in the username of the user you want to assign that chore to. Then below that, click the downward arrow button to select which group you want this chore associated with. Click the blue plus button to finish assigning the chore.
  - ○ If you have assigned this chore to yourself, then once you refresh the page, you should see the task listed as a button under "Your Tasks"
  - ○ If you have assigned this chore to other users, then you will not see that task appear anywhere, but if the other user logs into their own account, they will see the chores you assigned them under "Your Tasks"
- ● Deleting Chores:
  - ○ In order to get rid of a chore, you just need to click on the button that chore corresponds with under "Your Tasks". It will delete itself immediately and will also be deleted from the firebase database. There is no need to refresh.
- ● Deleting a Group:
  - ○ Click on the group you wish to delete under "Your Places". All of the groups will disappear. Refresh the page and the groups will reappear, but the group you deleted will no longer be there (and it will also have been deleted from the Firebase database)
  - ○ Note: This also deletes the group for other users. This will delete it completely from the firebase database.
